THE COMPLETE CLEAN
&HYGINE SOLUTION

WELCOME TO OUR COMPANY

We as Ekdant Equipments Pvt Ltd. is committed to providing world class solution in the field of Vacuum extraction technology in India.

We cater all kind of requirements to extract dust, debris, Particles, liquids etc. from any kind of surfaces.

INDUSTRIAL VACUUM SOLUTION

EEPL approach to sustainability is based on corporate social responsibility, which means and aims at caring for people and the environment.

Ours is a daily commitment towards those working with us to guarantee they have the best working conditions and a healthy workplace, as well as towards consumers, for whom we offer top product quality, both in terms of safety and performance

Industrial vacuum cleaners play a crucial role in the manufacturing sector by ensuring cleanliness and safety within the workplace. They are indispensable devices designed to eliminate various airborne particles, including dust, fumes, and vapors, generated during manufacturing and material processing operations.

Each industry has different application needs and situations that will require specific vacuum solutions, even down to the materials, the amount to be vacuumed, and the working conditions.

RELIABILITY

WHAT MATERIAL YOU NEED TO VACUUM UP?

Discover the diverse materials that require specialized vacuuming solutions. From dust and debris to liquids and hazardous substances, various materials necessitate different approaches when using vacuum cleaners.

Explore how industrial vacuum cleaners can effectively handle these materials, ensuring cleanliness and safety in diverse settings. Choose the right vacuuming solution for your specific needs in the manufacturing industry and beyond.

HIGH POWER INDUSTRIAL VACUUM

Designed to tackle substantial quantities of dust, debris, and pollutants generated by intensive industrial processes, high-power three-phase industrial vacuum cleaners excel in heavy-duty applications. Equipped with advanced filtration and collection systems, these high-powered vacuums efficiently extract significant amounts of material, creating a safer work environment for employees and mitigating the industry's environmental footprint.

FLOOR PREPARATION
SILICA DUST

- High suction performance
- Ability to work 24h continuously without the need for maintenance
- Highly customizable products

OUR PRODUCT

- 01** WET & DRY INDUSTRIAL VACUUM CLEANER
- 02** INDUSTRIAL VACUUM FOR LIQUIDS
- 03** CENTRALISED VACUUM SYSTEM
- 04** INDUSTRIAL VACUUM FOR SILICA DUST
- 05** EXPLOSION PROOF VACUUMS FOR COMBUSTIBLE DUST
- 06** SUMP VACUUMS FOR OIL & SWARF COLLECTION

HIGH PERFORMANCE SUCTION UNIT

The suction is produced by robust side channel blowers, ensuring uninterrupted 24/7 service without the need for maintenance. These blowers offer maximum reliability and performance

HIGH FILTRATION EFFICIENCY

Industrial vacuum cleaners are equipped with advanced filtration systems to ensure superior air cleanliness. High-efficiency filters allow dust and solids to be safely vacuumed, returning only filtered air to the work environment.

PRODUCT RANGE

Power : 1.5 kw to 15 kw

**Vacuum : 2000 to 4200
mm WG**

**Airflow : 320 to 1350
m3/hr**

CENTRALIZED
